Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 8, 2003 has been entered.

The amendment filed on February 18, 2004 has been entered.

Claims 1-4 and 6-14 are pending.

Specification

A substitute specification with the claims is required pursuant to 37 CFR 1.125(a) because the facsimile is illegible for printing.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3753

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gardner.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Vollhardt.

Claims 1-4 and 6-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Miller (2,110,024).

Claims 9-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Miller (2,608,388).

Claims 1-4 and 6-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Dawson. Regarding claims 4, 8, 11 and 14, the plugs 10 of Dawson are capable of being detached.

Claims 1-4 and 6-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Nickerson et al. Regarding claims 4, 8, 11 and 14, the plugs (incorrectly labeled as 31) of Nickerson et al are capable of being detached.

Response to Arguments

The rejection in view of Kessler is withdrawn.

Applicant's remarks with respect to Gardner have been fully considered but are not persuasive. Initially, the "compartments" of Gardner are read as "connecting channels." There is no claimed structural difference between the "compartments" and the "connecting channels." Lastly, the tubes 15 of Gardner are "separately connected" to compartments 7 and 8 of tubesheet 4, which are read as "the tube-sided supply and discharge means."

Applicant's remarks with respect to Vollhardt have been fully considered but are not persuasive. The tubes 3 of Vollhardt are "separately connected" to tubesheet 4 via welds. The tubes have dual passages. The passages are not read as separate tubes.
